

MiTImEASURE

"Accurate measurement, **Mighty Durable**"

- UV Resistant protective coating
- High Slip, ZERO stretch core
- Available in imperial and Metric
- High visibility non glare line and labels
- Tangle Free

The MiTiMEASURE is the ideal measure with a few great extras which include easy to read labels, a thick protective coating and a choice of either Stainless Steel or Polyester core. This Australian designed tape measure will not tangle or knot, is easy to wind up and slips effortlessly along wet ground allowing the user to survey and dip holes much quicker. More durable than alternatives, the MiTiMEASURE is the obvious choice when it comes to harsh environments.

MTi Group also have a great range of accessories to make the job EVEN easier. (See overleaf)

ACCESSORIES

Surveyors Rope

The surveyors rope series is your budget type tape measure particularly good in conditions where very abrasive ground is encountered. The ropes are marked one side only with black and red numbers on a white background, the ribbons are approximately 6mm wide. They are coated with a PVC shield and are compatible with the PolyLine Hand Reel. Available in 30m, 50m and 100m lengths the SR series is your economical choice.

Cordwheel

MTi Group is the distributor for the Cordwheel, designed for military applications, the cordwheel can withstand most things a mine site could subject it to. Made from an impact resistant UV stabilised plastic the Cordwheel conveniently fits all MTi measuring products from surveyors tapes to MiTiMeasures and Thermo Measure.

Weights

MTi group have conducted studies into optimum weight and profile for dipping weights. Available in 150g, 360g, 460g and 600g the dipping weights are perfectly suited for deep, inclined and shallow holes. The flat base provides an increased sensitivity when dipping for water or explosives level. Tried and tested, MTi Group's range of weights are the first of their kind to be designed exclusively for the explosives industry.

Canvas Hand Reel

The Canvas Hand Reel is lightweight, robust and easy to use. Made to suit the MiTi Measure product range, the Canvas Hand Reel sits flat and is made from a durable long lasting heavy duty canvas allowing the MiTimeasure to be easily packaged for compact transportation and use. The Reel is 400mm in diameter and is guaranteed to increase the life of your product and make all of your general measuring tasks more manageable.
