

# Blocking Products

**MTi GROUP offer an extensive range in blocking products for the mining industry. All blocking products have been selected for ease of use and to create a varied and extensive range of options to suit your particular situation. With consideration of the broad conditions and circumstances you encounter MTi Group have designed diverse top quality blocking products at competitive prices.**

*MiTi Plug (part # MP series) 250 per box*

The MiTi Plug is made from a soft Polyethylene and is easy to locate in holes for 64 - 102mm. Used for retaining explosives up holes it is a cheap alternative to the SlumpStoppa and CollarCap.

*Uphole Spiders (part # Spider-M-II) 100 per box*

The spiders have been specifically designed to assist in up hole loading in broken ground. The tapered leading edge allows the primer unrestricted passage without hanging up or locking in the hole. This ensures safe deployment and fast location to the desired depths. The spiders are made with reinforced legs to lock the primers in place so they don't move during loading and the undercuts that form part of the body lock on to all manufacturers primers. The design of these spiders is unique combining function with durability where the plastic has been selected to withstand impact but be rigid enough to hold tightly onto primers to avoid the need for tape to secure.

*Slump-Stoppa Bottle Brush (part # SS series) 48 per box*

The Slump-Stoppa Bottle Brush come in a range of sizes. The SS100 will suit 64mm holes, the SS148 will suit holes from 89-102mm and the SS160 will suit 115-140mm holes. This product is used as a retention plug for Emulsion charging in an uphole mining application. The SlumpStoppa bottlebrush consists of green Polypropylene bristles wound perpendicularly around a spiralled, plastic coated wire spine. The total length is 300mm and the diameter taken from tip to tip of the bristles is 145mm.
